BUYER'S GUIDE
BOOKLET
4TH EDITION

Nearly 100 years ago, a group of individuals set their sights on a dream to change the design world. A dream of changing the materials that were being used, to change manufacturing techniques, and to change the look of the world. Their brief period together at the Bauhaus left its imprint across the world and left a major imprint on the evolution of design.

Founded over 30 years ago, Malik Outdoor is still using these guiding principles that were laid out by the Bauhaus. Since its beginning, Malik Outdoor has been a leader in offering innovative furnishings, for both indoor and outdoor environments. It is the endeavor of Malik Outdoor to continue provide innovative and functional pieces that push the design envelope and being the leaders in the evolution of site furnishings.

In the Malik Outdoor line you will find some of the world's great designs from industry leaders such as Bellitalia, City Design, LAB23 and Puczynski. You will find experiments with materials and shapes. You will find forms created from minds that never stop thinking about possibilities.

It is from these concepts that Malik Outdoor strives to deliver to you the finest possible site furnishings in design and quality.

MALIK
outdoor

Bellitalia is one Europe's leading companies in pre-cast mold stone production. Renowned for its site furnishings and landscaping solutions, Bellitalia is differentiated from others by the materials it uses, high quality craftsmanship, innovation, and novel, modern design.

Bellitalia manufactures and markets hundreds of products defined by unique Italian style and aesthetics: functional items that fit perfectly in every architectural space, as well as precious and sophisticated products made in combinations with different materials. Bellitalia's success has come from its ambition to transform simple items of street furniture into stylish products designed to be functional, but at the same time make the city beautiful. Great attention is paid to the element of space, which plays an essential role in modern urban centers. The creative spirit of Bellitalia's designers and their desire to offer innovative solutions, have ensured that Bellitalia will continue to be a leader in the site furnishing sector.

Appreciation for good design, hard work and frugality are deeply rooted in City Design's DNA. 150+ products and many projects later they still live and breathe well-designed, affordable site furnishings.

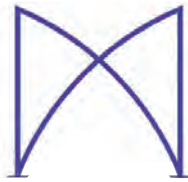

City Design's extensive range of products allows one to think in terms of the complete "look and feel" of the urban space, not simply design great street furniture. City Design thinks of themselves as "street stylists" playing with different colors, textures, and finishes to maximize opportunities and choice to create a unified & unique space.

Starting with the basic idea that simplicity wins over complexity each time around, they have brought everything from design to manufacturing, to customer service in-house to eliminate any inefficiencies or unnecessary levels of uncertainty. Having everything "under one roof" helps save clients' time, resources and makes each step pleasantly smooth and predictable.

With each new product, there is a focus on making it useful, affordable and unique. To City Design, this is the essence of "smart design", because while trends and forms may change, quality and value never go out of style.

LAB23
urban&outdoor solutions

LAB23 offers a varied range of products – benches, litter bins, bollards, planters, bike racks, and tree grates – for a total of about 200 products meant for both public and private clients. All products are characterized by a contemporary design combining rigid, essential shapes with soft and sinuous ones with high-quality, high-resistant materials that require very little maintenance costs. To achieve this, LAB23 chooses materials like galvanized steel, stainless steel, and hardwood.

The Venetian company boasts collaborations with internationally renowned designers like Zaha Hadid, Stéphane Chapelet, Roberto Semprini, Fuksas and Karim Rashid and offers the skills of many other qualified designers in order to create customized products. Each product is carefully studied, from the conceptualization to the execution, from the assembly to the installation, by their technical department, which ensures quality of the final product.

Puczynski was established in 1978 and is the leading producer and designer of street furniture in Poland. They specialize in the design and manufacturing of a wide range of site furnishings. Their extensive product range, as presented on their website and in their catalog, is based on the successful combination of quality craftsmanship, functional design, durable materials and comfort.

Due to the variety and sheer number (over 2000) of combinations of products, Puczynski has become specialists in made-to-order custom products. This ability allows them to meet your requirements with tailor-made solutions. Anti-corrosion, vandalism proofing and other technical innovations mean that their street furniture is robust enough for the most exposed and heavily used sites, without prejudicing ecological or safety standards. Individual design created in-house, combined with production from scratch, constitutes the basis for the unlimited development of new ideas and modernization of existing designs.
